

# **Registration of Arasien® Horses with in the ZSAA, Breeding Association for Sportshorses of Arabian descent inc. ([www.zsaa.org](http://www.zsaa.org)) (No. 22.73 of the breeding book = Arabic Partbred special horse (APb-SP) section: Arasier®)**

## **Breeding definition of the Arasien® Horse:**

In the APb-SP section "Arasien® Horse" are admitted as original breeds:

- Akhal-Tekes that are or could be registered within the Russian mother-studbook (MAAK/VNIK) with at least 75% of purebred Akhal-Teke bloodlines,
- Arabian horses from the breeds purebred Arabian or Shagya-Arabian as purebreds or Arabians, Partbred-Arabians and Anglo-Arabians which hold purebred Arabian bloodlines of at least 75%.

In the APb-SP section "Arasien® Horse" horses can be registered which ancestors show in their pedigree

- a genetic portion of at least 12.5% Akhal-Teke and at least 12.5 % of the purebred Arabian bloodlines and
- a genetic portion of a total of at least 75% of the before named original breeds.

The breeding involves a special attention of the performance abilities of both original breeds concerning the genetic portions independently. The Arasien® Horse is a breed with a recognizable competitive type of both original breeds that is suitable for all kind of horse-riding and in particular for the endurance sport. It shows nobility, highest performance ability stamina, healthiness and in particular the utmost ability for galloping.

## **Registration of the Arasien® Horse**

Horses are registered with the suffix "Arasien ® Horse" in the departments stallion's book I (with appendix), stallion's book II (with appendix), studbook for mares (with appendix), as well as a prebook, if

- the respective registration conditions of the section APb-SP are fulfilled,
- the genetic portions correspond with the conditions of the before-listed breeding definition,
- they derive from parents who both have fulfilled a performance test according to the requirements of its own breed,
- as a stallion they have to be licensed for the APb-SP breeding and have to fulfil a stallion's performance test, e.g. ZSAA-performance-test, ZSAA-endurance-test, successes on the race-track, or a test at a performance-station (30- or 70-day-test) successfully.
